SUMMARY

Final-year Computer Science and Engineering student passionate about building software that solves real-world problems, from full-stack web platforms to cross-platform mobile applications. Skilled in Python, C, Java, React, JavaScript, React Native and Node.js with internship experience in Python development, collaborative software engineering and cybersecurity. Strong problem-solving ability with a solid foundation in Data Structures and Algorithms, Object-Oriented Programming, DBMS and Operating Systems. Seeking a Software Engineer role to contribute to innovative products while continuously expanding technical expertise.

EDUCATION

B.Tech in Computer Science and Engineering	2023 – Present
St. Joseph's College of Engineering and Technology, Palai	CGPA: 8.48/10 (Up to Semester VI)
Higher Secondary Education	2021 – 2023
Holy Cross Higher Secondary School, Cherpunkal	97.75%
Secondary School Education	2020 – 2021
Holy Cross Higher Secondary School, Cherpunkal	100%

TECHNICAL SKILLS

Languages	Java • Python • JavaScript • C • SQL
Frontend	React • React Native • Expo • HTML5 • CSS3
Backend	Node.js • Express.js
Databases	Supabase • MongoDB Atlas
Core Concepts	DSA • OOP • DBMS • Operating Systems • Computer Networks • REST APIs • JWT Authentication • Role-Based Access Control (RBAC)
Tools	Git • GitHub • VS Code

INTERNSHIPS

Cybersecurity Intern	June 2026
<i>μLearn</i> SJCET, Palai	
- Completed a one-month cybersecurity internship covering Linux, networking, web security and reconnaissance. - Performed hands-on security labs focused on vulnerability assessment and secure computing practices. - Analyzed common security vulnerabilities and applied basic mitigation techniques through practical lab exercises. - Strengthened analytical thinking and teamwork through collaborative cybersecurity challenges.	
Python Intern	June 2025
Soften Technologies	
- Developed Python programs using OOP concepts, file handling, exception handling and modular programming. - Practiced debugging, algorithm implementation and structured software development through practical assignments. - Wrote clean, modular and reusable Python code following object-oriented programming principles. - Improved programming and problem-solving skills through industry-oriented training.	
Software Development Intern	June 2025
The Nexus Project	
- Participated in a project-based software development internship focused on collaborative application development. - Applied Git workflows, debugging strategies and software engineering practices in team projects. - Collaborated with team members to design, implement, test and document application features following Agile-inspired practices. - Strengthened collaboration, version control and project execution skills through Agile-inspired development.	

PROJECTS

CampUs

Full-Stack Campus Collaboration Platform | Mini Project

Key Technologies: React Native, Expo, TypeScript, Node.js, Express.js, Supabase (PostgreSQL)

- Designed and developed a full-stack campus collaboration platform connecting students, faculty, alumni and administrators.
- Developed the application using React Native, Expo, TypeScript, Node.js, Express.js and Supabase.
- Implemented role-based authentication, campus feeds, event management, discussion forums, mentorship and project collaboration.
- Integrated AI-powered recommendations to improve campus engagement and content discovery.

EHR-ASSIST

Healthcare Platform | Top 3, SIH 2025 (College Prelims)

Key Technologies: React Native, Expo, Redux Toolkit, Node.js, Express.js, MongoDB Atlas, JWT

- Developed an offline-first healthcare platform for ASHA workers using React Native, Node.js, Express.js, MongoDB Atlas and Redux Toolkit.
- Implemented JWT authentication, role-based access, GPS-enabled patient tracking and centralized health records.
- Enabled offline synchronization with conflict resolution for low-connectivity environments.
- Secured Top 3 in the Smart India Hackathon 2025 College Preliminary Round.

Recovera

Full-Stack Lost & Found Platform

Key Technologies: Node.js, Express.js, MongoDB, JavaScript, Tailwind CSS, JWT, Leaflet Maps

- Built a full-stack lost-and-found platform enabling users to report and recover missing items.
- Implemented JWT authentication, responsive Tailwind CSS interfaces, image uploads and Leaflet Maps integration.
- Designed an efficient reporting workflow with advanced search, filtering and real-time status updates.

Kerala BioDiversity Platform

Biodiversity Discovery Platform

Key Technologies: React, PlantNet API, iNaturalist API

- Developed a React-based biodiversity platform integrating the PlantNet and iNaturalist APIs for species data.
- Implemented searchable species discovery, comparison and favourites features.
- Built reusable React components with a responsive interface for improved accessibility.

CERTIFICATIONS

- Data Structures and Algorithms — Infosys Springboard
- Java Programming Fundamentals — Infosys Springboard
- CompTIA IT Fundamentals: Operating Systems — Infosys Springboard
- Networking Basics — Cisco Networking Academy
- Introduction to Mobile App Development — IBM (Coursera)
- Foundations of Coding: Full-Stack — Microsoft (Coursera)
- Git Basics for DevOps — KodeKloud (Coursera)

ACHIEVEMENTS & ACTIVITIES

- Secured **Top 3** position in the Smart India Hackathon 2025 (College Preliminary Round) for developing **EHR-ASSIST**.
- Participated in the NASA International Space Apps Challenge (2024 and 2025).
- Participated in the Workshop on Securing the Cloud during KETCON 2024.
- Volunteered for the Root Access technical coding event during ASTHRA 9.0, the National Level Technical Festival at St. Joseph's College of Engineering and Technology.
- Volunteered as a member of the Decoration Team during ASTHRA 10.0, the National Level Technical Festival at St. Joseph's College of Engineering and Technology.
- Participated in the BODHI 2026 Source Code technical event.
